

WORLD IN ELECTRIC GREEN

-Avinash Goen
-Minal Sheth
-Punit Drolia
-Syed Abbas Raza

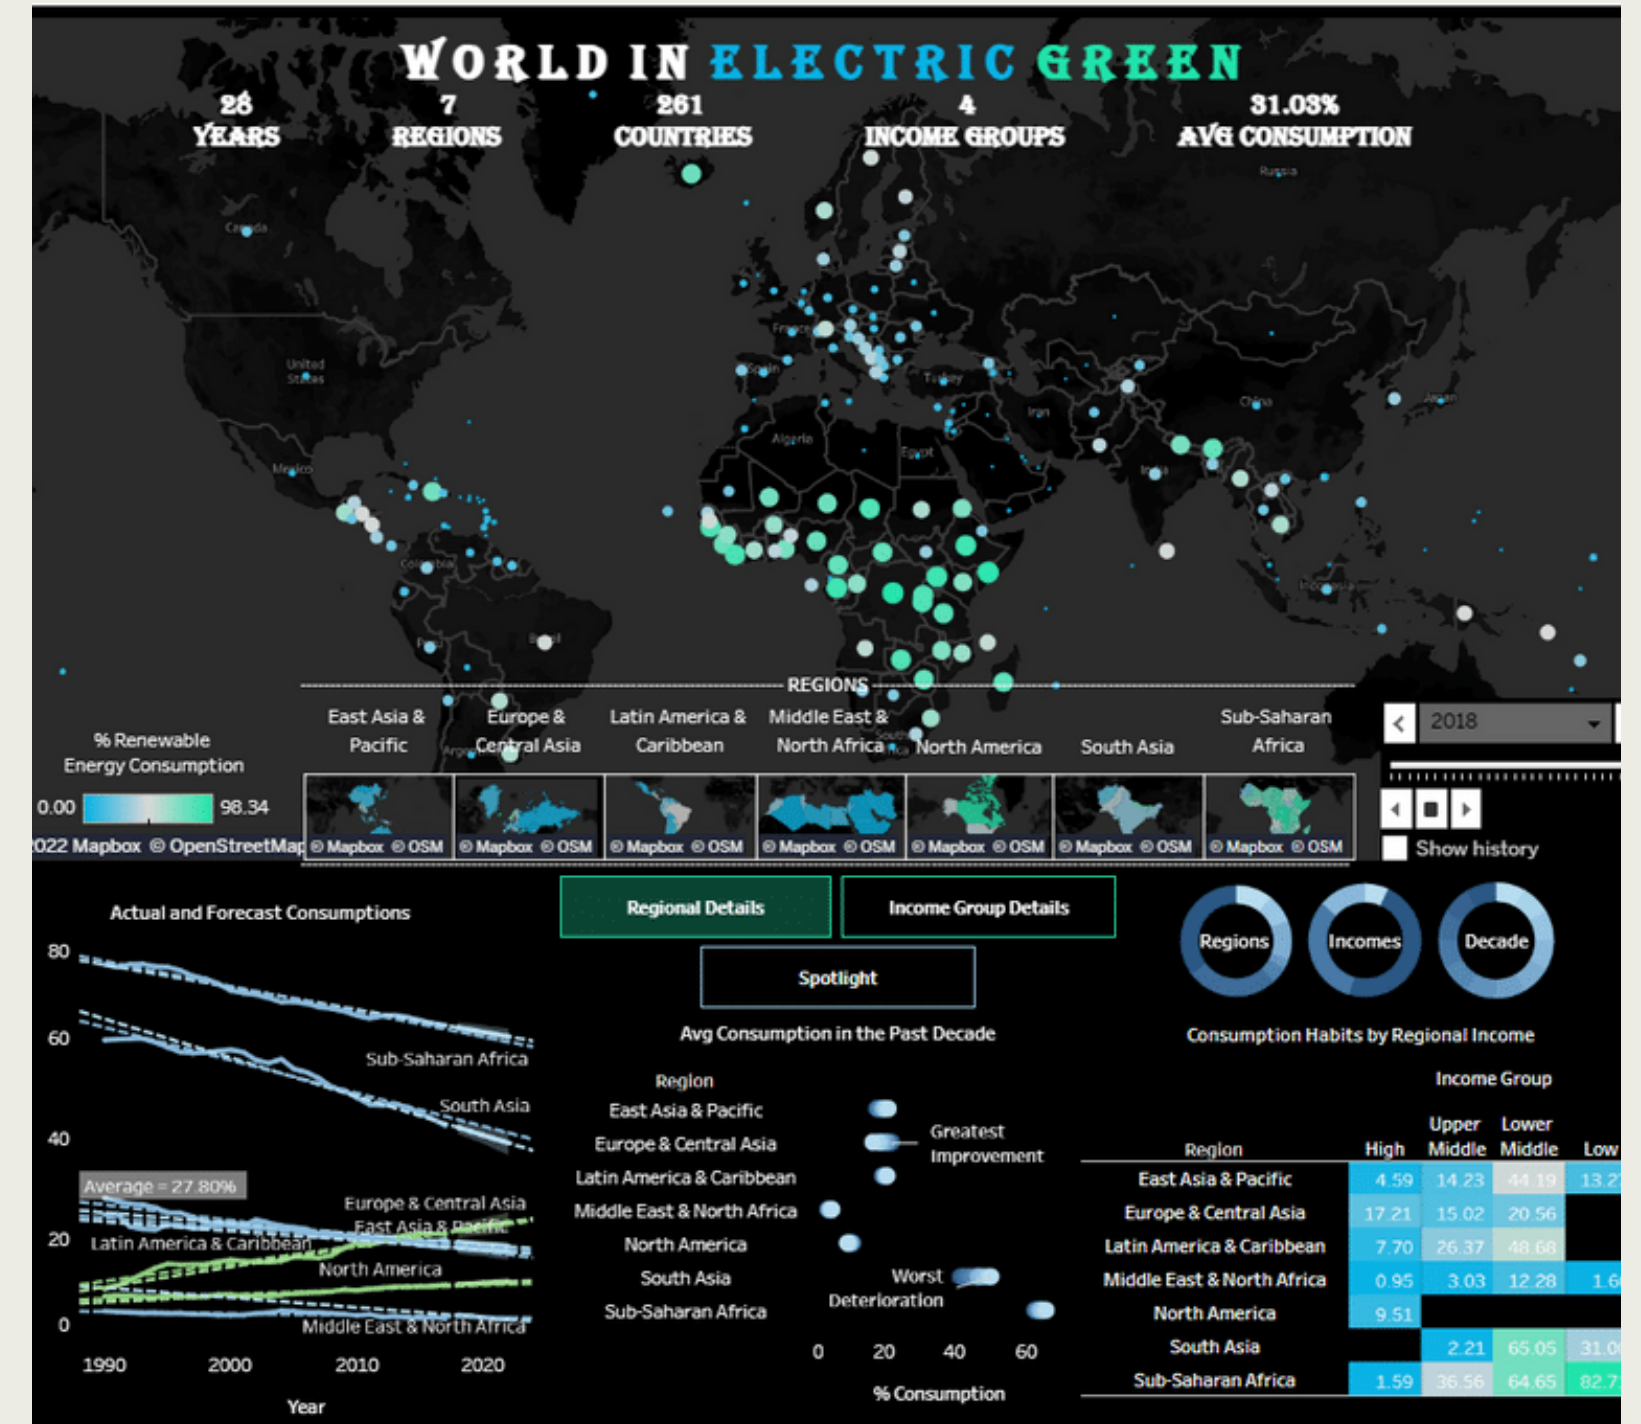

PROBLEM STATEMENT:

Renewable energy consumption trend across different regions over past few decades.

Data: We have extracted data from World Bank Website. We had to perform data cleaning and activities like merging datasets. We also used ezGeocode to find locations.

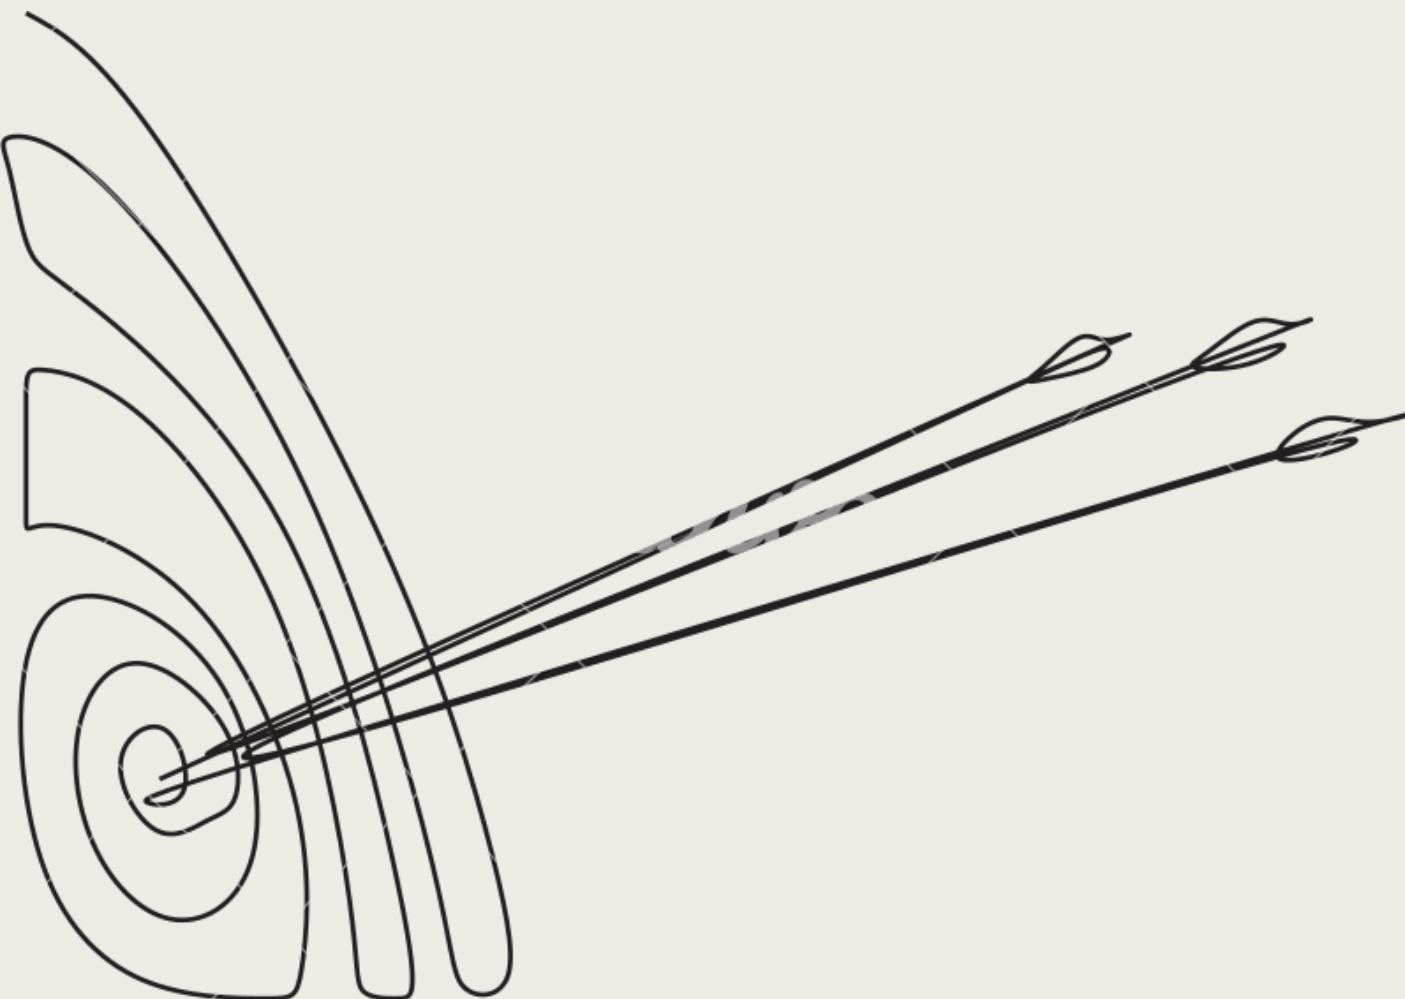

Attributes: The dashboard represents variety of graphs and charts but we could find a lot of glitches, with lot of information cluttered in a small space.

World in Electric Green -
Renewable Energy Consumptions | Tableau Public

KEY TAKEAWAYS:

- High Income > Growth in usage of renewable energy
- Increase of renewable energy usage in European nations
- Decrease in percentage usage of renewable energy in Sub-Saharan Africa.

THANK YOU!
